### **DETAILED ACTION**

The following office action is in response to the application filed on July 12, 2006. A preliminary amendment was filed on July 12, 2006. Claims 1-15 are cancelled. Claims 16-36 are newly added and pending.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Hassan (WO 98/52182)

As to dependent claim 16, Hassan teaches a monitoring device (21 and connecting beams) for a rechargeable personal portable device of the type having a main body to which is attached a display (110), said monitoring device being coupled to a portion of said main body at least temporarily and including at least one optical device provided for calibrating the display, the monitoring device serving to recharge a battery of the personal portable device (page 19).

As to dependent claim 17, limitations of claim 16, and further comprising, Hassan teaches wherein said optical device comprises a light sensor (21, is a camera)

As to dependent claim 18, limitations of claim 17, and further comprising, Hassan teaches wherein said light sensor is spaced away from said display during monitoring of the display by monitoring device (

As to dependent claim 19, limitations of claim 17, and further comprising, Hassan teaches wherein said light sensor is a camera (21)

As to dependent claim 20, limitations of claim 17, and further comprising, Hassan teaches wherein said portable device is a laptop computer and said sensor is a camera (pages 19-21).

As to dependent claim 21, limitations of claim 17, and further comprising, Hassan teaches wherein said sensor is a camera having a lens with an optical axis, the camera having a sensor array the plane of which is oblique to the optical axis (pages 19-21).

As to dependent claim 22, limitations of claim 17, and further comprising, Hassan teaches wherein said portable device has a main body with a hinge for a display at one end of the main body and wherein said sensor is a camera placed near an opposite end of the main body (pages 19-21).

As to dependent claim 23, limitations of claim 16, and further comprising, Hassan teaches wherein said monitoring device is a cradle (pages 19-21).

As to dependent claim 24, limitations of claim 16, and further comprising, Hassan teaches wherein a pixel of said display is driven so that its emitted light is modulated and wherein the modulated light is detected by means selective to the modulation (pages 19-21).

As to dependent claim 25, limitations of claim 16, and further comprising, Hassan teaches wherein a pixel of said display is driven so that its emitted light is modulated by a repetitive signal and wherein the modulated light is detected by means selective to the repetition rate of said signal (pages 5, 19-21).

As to dependent claim 26, limitations of claim 25, and further comprising, Hassan teaches wherein said camera is of lower resolution than said display (pages 5, 19-21).

As to dependent claim 27, limitations of claim 16, and further comprising, Hassan teaches wherein said monitoring device comprises an electrical connector carrying an optical device used for calibration of said display (pages 19-21).

As to dependent claim 28, limitations of claim 16, Hassan teaches wherein said display is an OLED display (abstract).

As to dependent claim 29, limitations of claim 16, and further comprising, Hassan teaches wherein said optical device comprises a reflector serving to reflect light from the display towards a light sensor (pages 19-21).

As to dependent claim 30, limitations of claim 16, and further comprising, Hassan teaches wherein said optical device is a light-guide serving to direct light from the display to a light sensor (pages 19-21).

As to claims 31-36, see limitations of claims 16-30 above.
